

# Soham Kubal

Performance Test Engineer

sohamk185@gmail.com | Mumbai, India | 8767245886 | [github.com/soham-kubal](https://github.com/soham-kubal)  
| [soham-kubal.github.io](https://soham-kubal.github.io)

## Profile

---

- Performance Test Engineer with 5+ years of experience in performance engineering, load testing, and test automation for large-scale enterprise applications.
- Specialized in designing modular JMeter frameworks, building Python-based automation pipelines for JMX management, and diagnosing production bottlenecks using Azure Application Insights, AppDynamics, and New Relic.
- Proven track record of reducing manual testing effort through framework engineering, AI-assisted development, and translating metrics into actionable insights using Grafana and Power BI.

## Professional Experience

---

### Performance Tester

12/2024 – Present

MUFG Pension & Market Services

Mumbai

- Architected a reusable, modular JMeter “Super Script” framework consolidating 17+ individual test plans into a unified structure, reducing script maintenance effort by 80%.
- Implemented automated UI and API testing frameworks, page object models, and web scrapers utilizing Selenium Java, Playwright, and Python to expand regression coverage.
- Built a Python automation framework (lxml, openpyxl) with 15+ CLI tools for JMX manipulation, eliminating 60 hours of manual XML editing per release cycle.
- Developed an automated Excel performance reporting pipeline processing JMeter aggregate CSVs for multi-run comparison and PROD performance statistics.
- Traced end-to-end transactions across microservices using Azure Application Insights, identifying 21 stored procedure and backend issues.
- Implemented dynamic CSV test data rotation using Groovy in JMeter tearDown for continuous execution across 100 virtual users.
- Leveraged GitHub Copilot to accelerate Python script development by 75%.
- Integrated InfluxDB and Grafana for real-time JMeter test monitoring and live dashboards.
- Automated API test suite execution and report generation using Postman and Newman across 13+ collections.
- Conducted performance test execution across STG, UAT, and PROD environments.

### Quality Engineering Analyst

08/2024 – 11/2024

Accenture

Mumbai

- Managed seamless transition of FedEx GSI performance testing responsibilities from Atos Syntel to Accenture, ensuring zero disruption to ongoing test cycles.

### Performance Test Engineer

03/2021 – 07/2024

Atos Syntel

Mumbai

- Led performance testing for the FedEx GSI project using JMeter and ReadyAPI, executing load, stress, and scalability tests across UI, API, and DB layers.
- Designed load test scenarios simulating 1200 concurrent users, identifying critical thresholds leading to 3 infrastructure scaling decisions.
- Automated functional and regression API testing using ReadyAPI, building 30+ test suites that improved coverage by 91% and reduced cycle time from 4 days to 7 hours.
- Utilized LoadRunner for testing a complex UI application and Oracle/SQL databases under 150–200 user load.
- Monitored server-side performance using AppDynamics, identifying 24+ bottlenecks across 36 releases.
- Analyzed LoadRunner and JMeter reports to resolve memory leaks and slow SQL queries, collaborating on 16+ performance fixes.

## Education

---

**B.E. Computer Engineering**

2016 – 2020

Mumbai University

Semester VIII CGPA: 9.58 • Overall (all semesters) CGPA: 7.39

## Skills

---

**Automation & Scripting:** Java, C, Groovy, JavaScript, Python, Selenium, Playwright, Apache POI

**Performance Testing:** JMeter, LoadRunner, Load/Stress/Scalability/Soak Testing, Baseline Analysis, Workload Modeling

**API Testing:** Postman, Newman, ReadyAPI (SoapUI), REST/SOAP API Validation

**Monitoring & Diagnostics:** Azure Application Insights, New Relic, AppDynamics, Heap Dump & GC Analysis

**AI & Productivity:** GitHub Copilot, Prompt Engineering, AI-Assisted Test Development

**CI/CD & Version Control:** Jenkins, GitHub, Newman CLI Integration

**Data & Reporting:** Grafana, InfluxDB, Power BI, Excel Automation (openpyxl), CSV/JTL Processing
